

# New product

Vol. 3

issued on June 19

Phass is always creating a fascinating sound vitally.

## MW 6512AL-N

### Hot product

Profound express ability and dense sounds exceeded previous ones of MW 6512.

## Profound and dense sounds

We proudly released the alternative of previous MW6512 mid bass driver to satisfy the strong demand from the market. This new MW6512AL-N also uses Alnico magnet which is increased the magnet power and the one piece construction paper cone which features rigidity and optimal curved figure.

As the main altered points, a gathering of small column type alnico magnets has been changed to a ring type alnico magnet with one piece construction. And the flat slanted cone figure has been changed to the curved figure of cone with keeping the same cone material.

As the results, MW6512AL-N has achieved the wider frequency range in comparison to previous model, and it can reproduce more profound and dense sounds and show the connecting balance with various type tweeters in condition.

#### Features:

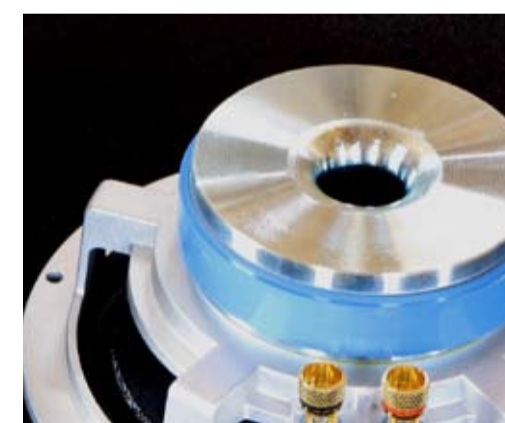

- \* Alnico magnet
- \* One piece construction paper cone
- \* 52 mm diameter voice coil

#### Specification:

- \*  $F_s$ : 80 Hz
- \* Efficiency: 85 dB
- \* Frequency response: 80 - 4,000 Hz

RIGID PAPER CONE

PRECISE METAL CONSTRUCTION
